#### NATHAN'S TOP TIPS WATERING PLANTS THIS SUMMER:

- 1. Mulch, Mulch, Mulch!** Mulching around the base of plants' roots will help to maintain soil moisture and keep those precious roots cool.
- 2. Water Infrequently but Deeply.** Don't just sprinkle a few drops of water around your plants everyday, but let a slow drip saturate the soil deeply a few times a week.
- 3. Irrigation Systems Can Be Helpful** If...the system is appropriately distributing water and is in working order. Make sure your system is working perfectly!
